

Acknowledgements

The authors would like to sincerely thank and acknowledge the valuable contributions of nine dedicated agricultural educators whose creative ideas and professional experience shaped this curriculum. Their comments and practical suggestions strengthened the curriculum and the associated activities. They also fearlessly taught the pilot version of the curriculum to their students and provided excellent feedback for the final edition. Their active participation in this project was critical to the development of this curriculum and its functionality in the classroom. We genuinely appreciate all the time and effort that the following teachers dedicated to this project.

Kent Benson

Winters High School
Winters, CA

Will Dukes

John A. Ferguson Sr. High School
Miami, FL

Isaac D. Habermehl

Pine Valley Central School
South Dayton, NY

Jeff Perry

Letchworth Central School
Gainesville, NY

George Sellu

Woodland High School
Woodland, CA

Tara Berescik

Tri-Valley High School
Grahamsville, NY

Judy Etcheverria

Santa Rosa High School
Santa Rosa, CA

Farrah L. Johnson

Deltona High School
Deltona, FL

Danette Philpot

North Marion High School
Citra, FL

We are indebted to the professional expertise of our project collaborators, Seth Derner, Lynn Martindale, Cary Trexler, and Shannon Washburn, who recruited the agricultural educators and offered their guidance in curriculum development. We also would like to acknowledge the following individuals who provided commodity specific guidance and editing, Jorge Fonseca, Barbara Ingham, Steven Ingham, Steven Murphy, Alicia Orta-Ramirez, Stephen Reiners, and Randy Worobo, and to Nicole Kahrs who contributed to the first version of the curriculum. We would like to thank Patricia McGlynn for conducting the Delphi study and the many other professionals who participated in the study or contributed to the creation of this curriculum. Although they are not named here, we appreciate them sharing their knowledge and their involvement in this process. We also wish to thank the USDA Agricultural Research Service for the use of their photos in this publication. Lastly, to our tireless graphic designer Mark Kogut, we offer our thanks for working with tight deadlines and way too many cooks in the kitchen.
