## **More Information about Food Science and Good Agricultural Practices**

For more information about Food Science and the many fields within Food Science covered in the curriculum such as Food Chemistry, Food Engineering, Food Microbiology, Food Processing, Food Safety, Food Toxicology, and Sensory Evaluation, contact the Food Science Department at a Land Grant University in your state or the Department of Food Science, 116 Stocking Hall, Cornell University, Ithaca, NY 14853, [www.foodsci.cornell.edu](http://www.foodsci.cornell.edu).

The Good Agricultural Practices Network for Education and Training (GAPsNET) at [www.gaps.cornell.edu](http://www.gaps.cornell.edu) provides access to educational materials specifically focused on fresh fruit and vegetable safety. At the GAPsNET, there are links to the National GAPs Program State Collaborators, who have expertise in produce food safety and a database of research and extension articles as well as information on how to begin implementing GAPs and many other helpful resources available in English, Spanish, and Hmong.
